F A Bullock MD : Adult Fantasy Coloring Book before purchasing it in order to gauge whether or not it would be worth my time, and all praised Adult Fantasy Coloring Book:

A collection of hand drawn graphite india inked fantasy, science fiction, comic, and horror illustrations intended for adult teen appreciation and coloring with various media. Appropriate for use with colored pencils, markers, watercolor, copics, acrylic paint, and other art media.

About the Author F A Bullock is a physician who, when not engaged in the practice of medicine, or attempting to train his unruly cats, enjoys dabbling in art. He believes creating art and even the process of coloring can be 'mind-resting' or meditative in nature. His vision for this offering is to appeal to others who have an appreciation for art, and as a

source for 'coloring therapy'. This first in a series of projects, is dedicated to his lovely wife Sadie, who is tolerant enough to do more than just put up with him– or put another way, she can live with his crazy.
