I can not wait to read her next book!! And when i say laugh out loud book i am in my town public library and i finish the book and there were points that were so funny that i literally laugh out loud and had no shame in doing it!Thank you for writing such good variable lesson and HILARIOUS stories as well!I love her style of writing! I love that she writes what is really on her mind and she is not worried that she will be in trouble. Some of the words maybe are to straight forward but i think that just who she is.Andrea Partee dont change you wording due to what another people are saying! I love when people just say what is really on there mind instead of beating around the brush. I have to admit i do that sometime but i am trying not to do that!I give this book 5 stars because it is very well put and very funny and laugh out loud funny!4 of 4 people found the following review helpful. LOLing still...even though i'm done reading!By Kindle CustomerThis book was HILARIOUS! And I mean, HI-LAR-IOUS. Not only was I cracking up practically the entire time I was reading it, but it just made me feel better about aging. Getting old sucks. And truly the only thing that helps, is to just laugh about it and embrace it, and that is exactly what the author does in this book. I highly recommend this book for anyone, young or old, because eventually the young will be in my place too! Andrea Partee is a great author, which I will continue to follow and look for her future publications. This book will lighten your mood in a split second. In the first of Partee's funny books for women, the award winning *Aging with Humor and Grace* could be described as a combination of Erma Bombeck and *Chicken Soup for the Soul*. Written especially for women over 40, more than middle aged women have found this book to be a delightfully funny read about change. While she certainly talks about discovering new wrinkles and personally experiencing the law of gravity, there is more. Embarrassing moments abound whether she's falling off her high heels in front of her ex-husband's wife at a wedding, managing to ride a bicycle after a 50 year break or discovering her happy trail has split and grown in abundance south of its prior location. Her funny stories include how to conquer restless leg syndrome; the challenges of running, playing tennis and trampoline jumping after years of being a desk jockey with the closest thing to cardio being a daily walk to the mailbox. You will find this humorous book isn't just about aging but about life's cup always being at least half full, no matter what the challenge. Partee's entertaining anecdotes will make you laugh whether she's describing the application of eye makeup with glasses on or what to do with that extra chin. You'll find funny short stories about parenting, family and relationships. All this is topped off with a few fears and phobias which add to this funny story like the cherry on top of an ice cream sundae.Andrea's authentic, honest and often hilarious sense of humor is like listening to your best friend (or wishing you had one like this) over a cup of freshly brewed coffee in the kitchen or a glass of wine outside on a summer evening. Instead Partee provides hilarious insight into the pitfalls of aging in a self-deprecating way to which we can all relate...or will eventually be able to relate. You don't have to be a woman of a certain age to enjoy her witty, and often embarrassing take on wayward hair growth, bodily functions, pregnancy and child-rearing among dozens of other frighteningly funny topics. Partee's book is aptly named because she deals with embarrassment, insecurity and tragedy with both humor and grace. Subtly touting the grace that comes from the ability to laugh at oneself, "*Aging with Humor and Grace*" is a refreshing take on a genre typically focused on how to reverse the clock and make your fifty year old bum look twenty again. Written in a fast-paced, acerbic manner, this book allows women to laugh about the inevitability of aging in an effort to accept what comes. Instead of pretending as though she has found the secret to aging gracefully, Partee simply provides her funny take on the things we are often afraid to talk about in public. When the time comes for you to cope with the hazards of aging, skip the self-help section and pass by the plastic surgeon's guide to aging gracefully and go straight to the humor section where Partee will happily guide you down the road to aging gracefully and hilariously. - - Natasha Jackson for Readers' Favorite
