This coloring book was lovingly created for all those, young and old, who wish to see with more creative eyes the wonders of the human body. Young artists can learn about the parts of the human body as they play, anatomy students can make more meaningful connections with their subject matter as they interact with it in a new way, and older artists can refresh their memories, or perhaps learn something new as they enjoy the relaxation that a good coloring session can bring. Let both sides of your brain dance in harmony as you relax, unplug, awaken your creativity and learn! Perfect for all ages! Coloring is not just for kids! Learn about the anatomy of the cell, skull, brain, neuron, eye, inner ear, tooth, skin, heart, lungs, digestive system, kidney, bones of the hand, and bones of the foot.
