**W.H. Carusso : My 365 Day House Cleaning Nightmare From Hell Journal** before purchasing it in order to gage whether or not it would be worth my time, and all praised My 365 Day House Cleaning Nightmare From Hell Journal:

During our live's we've all done our fair share of housework. However, some more than others have really towed the line in taking care of the family. That's why I created this journal to give homage to the caregiver that has truly kept

the family going. We usually call her mom. Now-a-days however, the rolls, have sometimes reversed. So I put a comedic spin on this 365-day journal. The inside pages are beautifully colored in a rainbow of colors and have every chore imaginable. It also contains 30 "Notes to self" pages for any documentation or notes you need to write to help you get things done throughout the day or send messages to your loved ones. They are covered with colorful socks and children to make your note writing that much more enjoyable. I hope you enjoy this fun but necessary, journal to help you get through your daily grind and show your loved ones who really pulls the weight in the family. It can also double as a checklist for the whole family to do their part in keeping the home running like a nice and neat orderly ship for the betterment of the whole family. I hope you have fun with this journal and may God bless you with a happy and healthy family. Your Author and friend W.H. Carusso.
