John Gruber, Chris Potter : My Wife Doesn't Cook (A Survival Guide For Men) before purchasing it in order to gauge whether or not it would be worth my time, and all praised My Wife Doesn't Cook (A Survival Guide For Men):

"My Wife Doesn't Cook" is a humorous cookbook/survival guide written by two regular guys, Chris and John. It's

written specifically for men from a man's perspective and is stocked with easy, fast recipes, shortcuts, and tips to get the food on the table. With this book, preparing a meal is so easy that even men can do it. Chris and John bring their real life experience to offer you the simplest approach to cooking ever. With their unique terminology and simplified measurement system, they can help even the biggest struggler become a decent cook. Guaranteed!

This is the best book I ever read! With this book, you really can get the food on the table. As Chris and John would say, "the book is SO easy that even men can use it."...a funny and immensely entertaining read...trust me, after sampling some of the recipes, I can tell you - these guys are the real deal. If you know a man, the odds are that he NEEDS this book! -- Book From the Author(John) One night Chris and I were sitting around drinking a bunch of beers. Well, Chris started telling me about one of his new recipes so I traded a few of my ideas. Carol, my wife, was totally fascinated by our conversation and said, "You know, you guys really oughta write a book." Well, we laughed over that, but a funny thing happened. The more we drank, the more sense it made. Come the next day, Carol's idea still made sense so here it is. You know, writing this book was easy and actually kind of fun. We just threw together all of our ideas and organized them a little. You know what the big problem was? Getting this thing published! Publishers have all kinds of silly rules. First you send them a proposal. Next, a query. Then you send them a manuscript. Then you wait around for about six months for the inevitable rejection letter. Well, we played this game a few times, but started getting pretty pissed. Hey, we've got this pretty decent book and lots of people are asking to buy it - and we can't even get it published? What's up with that? A wise man once said, "if you can't figure out how to get something done, invent a way". So that's what we did. We published the book ourselves. Check it out. We think you'll like it. About the Author Chris and John are just two fun-loving guys who really know how to cook. Chris is originally from England, and even though he has been living in the states for the last twenty years, to hear him speak, you'd think he was "right off the boat"!
