Definitely not an adult coloring book. Will give to my 6 year old granddaughter. 1 of 1 people found the following review helpful. Love the different drawings thru out book. By Debby I really love this coloring book. I received it as a pdf to download and print off myself, I like how the drawings are so detailed. Like for instance the eyes you are able to color the pupil with different colors so they look real. Also the eyelashes are actually there! You get different types of fairies in here also. I was so pleased to find a male faerie. Now my husband will color with me. He didn't like the idea of coloring females and flowers and what nots. haha I like how the lines just seem to flow thru all the drawings. This is so far one of my favorite coloring books to go to right now. I disclose I received this free for my honest and unbiased review. 0 of 0 people found the following review helpful.

Mystical Fairies is a beautiful and interesting coloring book. You won't want to miss this one. NOT AT ALL. By MindyHi All. Well, here is another fairy book by Infinity Coloring Books. I must say, I am really enjoying this book. It contains pages with fairies playing musical instruments, fairies tending the heavens, and don't forget the males that love them. Yes this book has a couple pages where he and his fairy are walking hand in hand, resting on the beach, watching mermaids. Don't forget about those little bitty fairies, castles, dragons, and roof top vistas. This book has a slightly different feel to it. It is a nice difference. I know that if you are reading this review, you are probably considering buying this book. Let me tell you that you will not be disappointed in any of the pages. The only problem you are going to have is choosing which is the first one to be colored. I cannot tell you anything about the paper that it is printed on, as I received my copy in PDF form. I can tell you that the designs fill the page, and are very engaging. My very first page colored is my space weaver page. I used gel-pens exclusively, and being up in the heavens, I used quite a bit of glitter. I call it, "Mystical Celestial Weaver". I used all the purple glitter colors in my gel-pen set. Her skin-tone was accomplished by using 2 colors together, lightest yellowy-orangey-creamy color, and the lightest pink. I started with the yellow, working in really small sections, and then immediately using the pink before the yellow dries. It makes a very nice skin color. I love this page. I hope you think it's pretty nice, too. Now, if you are wondering if I received my PDF copy in exchange for an honest review, well, yes I did. My opinion is always given honestly. Please, don't hold that against this beautiful book. You won't regret purchasing it. I'm very happy with mine.
