With humor, quotes and insight from Lao Tzu's Tao Te Ching the author makes his argument for the modern day investor. To follow the trends via the ancient writings of the Taoist is just as important as the "experts"! To listen to the right brain as well as the left.0 of 0 people found the following review helpful. Good readBy Geoff WoodsGoodspeed presents an interesting angle on how to look at markets a bit differently to everyone else, piecing together information which may seem disparate at first glimpse, but shows how even remote information all adds to the big picture.0 of 1 people found the following review helpful. Five StarsBy AG-customerExcellent book!

Now you can have the money-making edge when investing in the stock market. Although influenced by logical factors, changes in the market are often irrational and illogical. this savvy and amusing little book demonstrates how - with the help of both the left (logical) and right (intuitive) hemispheres of your brain - you can anticipate market

fluctuations and achieve greater financial return.
