Barb Karg : The World's Stupidest Athletes before purchasing it in order to gage whether or not it would be worth my time, and all praised The World's Stupidest Athletes:

This side-splitting collection details the most ridiculous, stupid, embarrassing and unintentionally revealing things our favorite-and not so favorite-athletes have ever said and done. Sure, they're known for their fancy footwork on the field but even the simplest of things (like words) can trip up these powerful titans. Consider the following: "The word 'genius' isn't applicable in football. A genius is a guy like Norman Einstein." -Joe Theismann, Super Bowl-winning quarterback and NFL MVP "Sometimes they write what I say and not what I mean." -Pedro Guerrero, World Series MVP, on sportswriters "We're going to turn this team around 360 degrees." -Jason Kidd, 8-time NBA All-Star It's all this and more when brawn forgets brains in *The World's Stupidest Athletes*. Complete with quotes and quizzes, jokes and true-life stories, this hilarious collection is the ultimate playbook of the IQ-challenged.

About the Author Barb Karg is a journalist, author, graphic designer, and screenwriter. She has written four feature length films, and dozens of books. When not writing, Karg continues to work as an editor, designer, and layout specialist. She lives with her better half Rick and their five opinionated four-legged children in the Pacific Northwest. Rick Sutherland is a writer, researcher, and screenwriter. In addition to being an author, Sutherland has edited hundreds of professional texts, including architectural, interior design, landscape design, and engineering books. He lives in the Pacific Northwest.
